Fitness Tracker Quick Start

1. Charging

Clip the tracker into the charging cradle. A full charge takes 90 minutes and gives up to 7 days of battery life.

2. Tracking

The tracker records steps, heart rate, and sleep automatically. Wear it snugly one finger width above the wrist bone for accurate heart rate.

3. Water resistance

The tracker is water resistant to 50 metres and can be worn while swimming. Avoid hot showers and saunas.
