Smart Speaker User Manual

1. Setup

Plug in the speaker and wait for the light ring to pulse white. Open the companion app and follow the pairing steps. Setup takes about 5 minutes.

2. Voice commands

Say the wake word followed by a command such as play music or set a timer. The microphone can be muted with the top button, which turns the ring red.

3. Troubleshooting

If the speaker does not respond, unplug it for 30 seconds. To factory reset, hold the mute button for 12 seconds until the ring flashes orange.
